ENTERPRISE OVERVIEW

Countdown timers for high-volume email.

EndsAt renders live, on-brand countdown timers for email campaigns. Enterprise plans are built for senders who need predictable volume, a dedicated timer domain, SSO, a DPA and a named support contact.

AT A GLANCE

Volume	Annual contract sized to your monthly and peak send volume.
Timer domain	Dedicated subdomain with your certificate and brand URL.
Access	SSO/SAML, team roles and brand workspaces.
Assurance	Written SLA, DPA, security review and invoice billing.
Delivery	API, batch generation and per-recipient or evergreen timers.
Deployment	Hosted with us, or self-hosted inside your infrastructure.

Included with every enterprise plan

- Volume-based annual pricing
- Unlimited timers and brand presets
- Custom TTF/OTF fonts and transparency
- Dedicated timer domain
- API access with higher rate limits
- Usage reporting and overage alerts
- SSO/SAML and team roles
- Written SLA and support targets
- Data processing addendum
- Invoice billing through Paddle
- Named account contact
- Self-hosted option

Built for teams that send at scale

Lifecycle teams

Launch, cart, renewal and event countdowns that stay on-brand in every client.

Agencies

Multi-brand presets, client workspaces and a dedicated timer domain.

Platforms

Generate per-recipient timers from your product or ESP with the API.

ENTERPRISE OVERVIEW

How an enterprise engagement works.

We keep enterprise commercially simple: one annual contract, a clear included volume, agreed overage and a written order form. No per-timer fees and no surprise marketplace checkout.

COMMERCIAL MODEL

Term	12 months, with renewal by written agreement.
Price	Based on included monthly views, domains, seats and support.
Overage	Agreed in the order form; live timers are not cut off.
Billing	Annual invoice through Paddle, our merchant of record.
Start	Scoping call, written quote, order form, then onboarding.

What we'll ask

- Monthly and peak send volume, plus the number of brands or domains.
- Your ESP or sending platform, and how timers are created today.
- SSO, DPA, security review or procurement requirements.
- Target start date, contract term and billing entity.

Onboarding

01 **Scope**
A 20-minute call to confirm volume, domains, access and timing.

02 **Quote**
A written order form with included views, overage and support terms.

03 **Launch**
Domain verification, SSO setup, brand preset and a test send.

Good to know

Countdown timers are loaded remotely, so some email clients block or cache them. EndsAt is a marketing and design tool, not a timekeeping system. Any SLA, DPA or custom terms apply only when set out in a signed order form.

Next step

Email hello@endsat.com with your monthly volume, domains and target start date. We'll reply with next steps and a written quote.
